

Turbo Snow Machine Instructions

1/ Partially undo the four bolts on the fan base

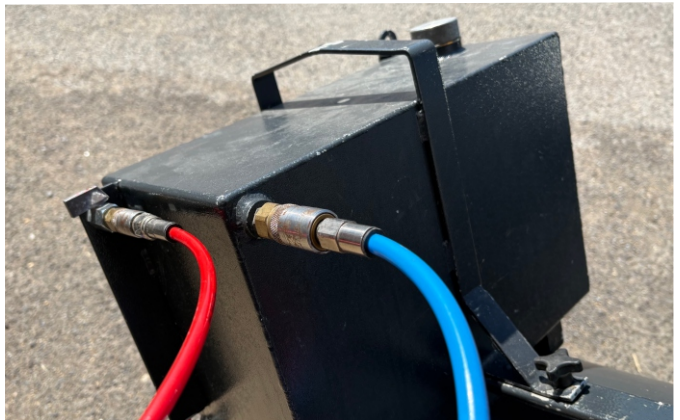

2/ Locate the snow head onto the base and tighten the bolts

3/ Attach the fluid reservoir to the fan base and fix in place with the thumb screw.

4/ Attach the red and blue pipes from the snow head to the fluid reservoir by sliding back the collar and inserting the quick connect into the hole.

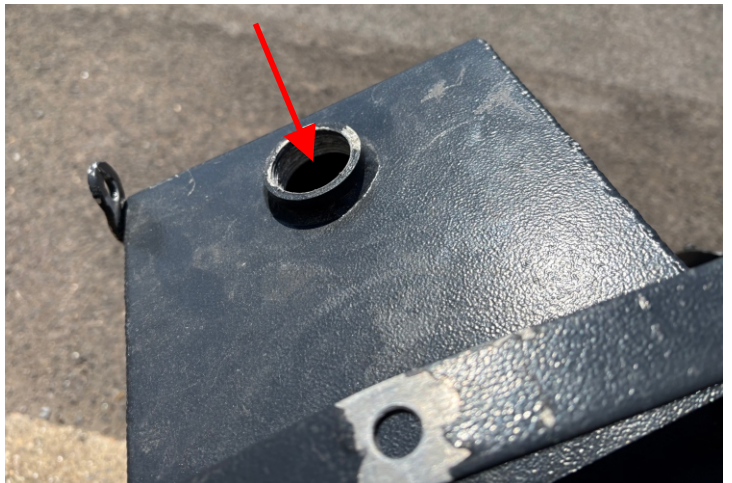

5/ Plug the blue and white plugs into the base

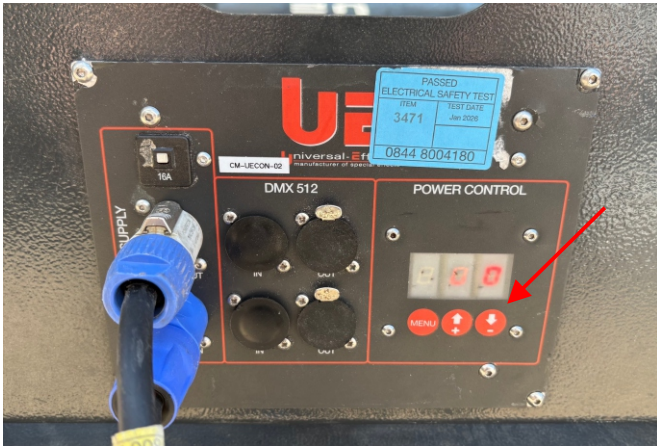

The white plug connects to the snow head.
The blue plug connects to the mains.
Make sure the power switch on the snow head is on.

6/ Undo the fill cap and fill the reservoir with snow fluid diluted to the correct ratio (see instructions on snow fluid concentrate). Replace the cap when full and tighten fully.

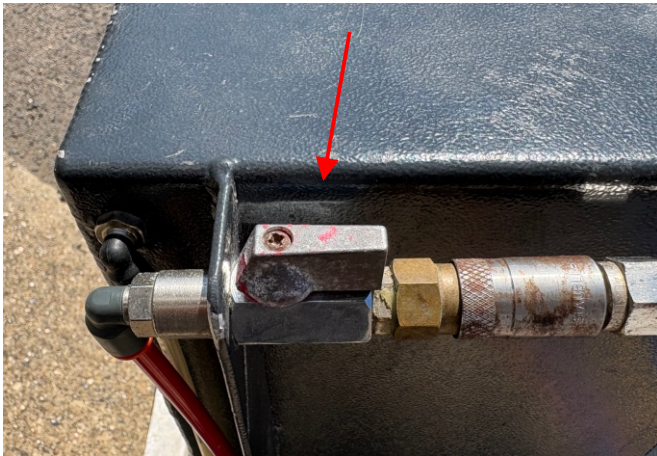

7/ When ready, push the minus button on the control panel and hold for 1 second. The fan will start, shortly followed by the compressor on the snow head.
